

Are you a part-time student, volunteer or unemployed?

Are you interested in building using a cheap and sustainable method?

If so our **new** two-day course
‘Rammed Earth Construction’
could be for you

- Learn about using sustainable building materials and techniques
- Develop your understanding of using passive and renewable technologies in constructing sustainable buildings
- Gain practical hands-on experience of working with rammed earth materials and equipment

By the end of this two day course you will have hands-on experience and confidence to build with rammed earth

For more information and to find out how to enrol please contact Michele Aprile at freecourses@bedford.ac.uk
